

FacilityWorX™

Software for Building Automation

The Open Standards Platform for
Integrating Building Automation Systems

Make Your Building or Campus Intelligent!

FacilityWorX™ from ICONICS enables facility managers to intelligently reduce costs, increase security, improve alarm response time and achieve better energy efficiency. FacilityWorX provides a software integration platform for existing building automation systems with open standards for a complete operational view of your campus. Integrate lighting, elevator, boiler, chiller, fire, generator, access control and HVAC control systems into one easy-to-configure operational console.

FacilityWorX Key Features

- ▶ Intuitive Web-enabled interface
- ▶ Native BACnet Support
- ▶ Configuration is easy with a symbol library
- ▶ Graphical interface or a tree navigational view
- ▶ Calendar based scheduling for planning
- ▶ Campus-wide alarm management
- ▶ Receive alerts via mobile devices or Web
- ▶ Ideal for display or video walls
- ▶ Certified on latest hardware and software

FacilityWorX Helps Sustainability

Building automation systems play a significant role in sustainability, but information required to effectively manage green buildings is scattered among multiple control systems. FacilityWorX is the sustainability platform needed for making your building more efficient. Use FacilityWorX to:

- ▶ Reduce overall carbon footprint
- ▶ Visualize and manage energy usage in real time
- ▶ Optimize and schedule climate and lighting
- ▶ Assist in meeting LEED certification

“FacilityWorX Future Proofs Your Investment”

Web Based Facility Management Platform

Web Visualization and Control

View and manage building operations using nothing more than your Web browser. Turn any PC into a Web-enabled client with live visual information to your desktop. Publish your existing displays as Web pages with a simple drag and drop. Web visualization scales with your operations.

Point-and-Click Configuration

With a single graphical interface, access and monitor local and remote facilities at all levels. Gain a global view or monitor, trend, schedule and acknowledge alarms at any level for temperature, door status, light zones and more. A comprehensive symbol library simplifies configuration.

- ▶ Integrate Existing Building Automation Systems
- ▶ Easy to Configure
- ▶ Built on Open Standards
- ▶ Real-time Tree Navigational View
- ▶ Advanced Calendar Scheduling
- ▶ Rich Symbol Library

Open Data Communication

FacilityWorX communicates via BACnet, Modbus, JCI N1, SNMP, LonWorks and OPC with your existing control systems. Reduce your installation and maintenance costs by eliminating multiple operator and management consoles. With open standards connectivity, ICONICS enables communications to all building devices and sensors.

Standard and Customized Reports

Create and deliver accurate, consistent reports. With a wide variety of charts and reports examine environmental or consumption based information from different building automation systems to maximize your operations. Out-of-the-box reports assist in your facility's Energy Star and LEED certification process.

Navigational and Schedule View

Operators react and adjust to potential issues in real time. View alarms and schedules at a glance and take immediate action with a tree navigational view of your facility.

The Pentagon (Washington, DC)

The Pentagon Operations Center

Kista Science Tower (Stockholm)

Federation Tower (Moscow)

“(On 9/11) What was the value of this system the day it did not shut down? From my laptop, I tapped into the Pentagon’s automation network and sent out commands that closed dampers and turned off fans around the building to contain the smoke.”

-Steve Carter, Facilities Manager,
The Pentagon

Why Choose ICONICS?

ICONICS, Inc. is a leading provider of award-winning visualization and building automation software solutions. With over 20 years experience, ICONICS has installed 250,000 applications in multiple industries, with 40,000 building control applications worldwide.

As an award-winning Microsoft Gold Certified Partner and OPC Charter Member, ICONICS provides customers with the greatest application performance, reliability and flexibility. FacilityWorX™ is certified for Microsoft Windows 7, Windows Server 2008, and Windows Vista operating systems guaranteeing your application will run for many years to come.

Visualize and manage your building's automation with open standards connectivity to ventilation, heating and air conditioning, lighting, generators, energy, fire alarms, elevator, access control and security systems from all major vendors.

Now it's easier than ever to monitor all your operations from a single platform!
